Regular research papers

Ślaby A., Lisowska M. – Epiphytic lichen recolonization in the centre of Cracow (southern Poland) as the result of air quality improvement

Kufel L., Strzałek M., Wysokińska U., Biardzka E., Oknińska S., Ryś K. – Growth rate of duckweeds (Lemnaceae) in relation to the internal and ambient nutrient concentrations – testing the Droop and Monod models

Xu D., Xu X., Xie Y., Wang K. – Dynamics of sandy desertification and detection of sandy land/steppe boundary: vegetation and soil properties

Song X., Jiang H., Peng C., Zhou G., Chang S.X., Yu S., Ma Y., Peng S., Wei X. – Leaf litter decomposition along the temperate – tropical transect (East China): the influence of stand succession, litter quality and climate

Chahouki M.A.Z., Anvazi L.K., Azarnivand H. – Comparison of three modeling approaches for predicting plant species distribution in mountainous scrub vegetation (Semnan Rangelands, Iran)

Özkan K. – Identification of driving factors for presence of endemic species in the Aglasun district of the Mediterranean Region, Turkey

Ivajnsič D., Cousins S.A.O., Kaligarič M. – Colonization by *Robinia pseudoacacia* of various soil and habitat types outside woodlands in a traditional Central-European agricultural landscape

Peng G., Wu C., Xu X., Yang D. – The age-related changes of leaf structure and biochemistry in juvenile and mature subalpine fir species (*Abies faxoniana*) along the altitudinal gradient

Czerniawski R. – Spatial pattern of potamo zooplankton community of the slowly flowing fishless stream in relation to abiotic and biotic factors

Ejsmont-Karabin J. – The usefulness of zooplankton as lake ecosystem indicators: Rotifera trophic state index

Dukowska M., Michałowicz J., Grzybkowska M. – Influence of natural organic matter and metal accumulation in sediment on riverine macrobenthos assemblages

Jakubik B. – Invertebrate reproduction in astatic water bodies: egg number – body weight relationship in *Viviparus viviparus* (L.) from oxbow lakes

Liu R.-T., Zhao H.-L., Zhao X.-Y. – Influence of grazing exclusion on soil macro-invertebrates diversity in degraded sandy grassland (Inner Mongolia, China)

Stojkovič B., Šešlija Jovanovič D., Tucič N. – Transgenerational effects on overall fitness: influence of larval feeding experience on the oviposition behaviour of seed beetle *Acanthoscelides obtectus* (Say)

Mikuška A., Krčmar S., Radovič A., Mikuška T. – The influence of temperature, precipitation and floods on the development of horse fly populations (Tabanidae) in alluvial habitats of the Danube River in Croatia

(continued overleaf)

Kim S., Srygley R.B., Lee J.Y., Lee S., Choe J.C. – Urban and natural components of Korean magpie (*Pica pica sericea*) territories and their effects on prey density

Jian J., Jiang H., Jiang Z., Zhou G., Yu S., Peng S., Liu S., Liu S., Wang J. – Evaluating the habitat quality of Giant Panda (*Ailuropoda melanoleuca*) using the Habitat Suitability Index (HIS)

Albayrak T., Giannatos G., Kabasakal B. – Carnivore and ungulate populations in the Beydaglari Mountains (Antalya, Turkey) – border region between Asia and Europe
